LATEST NEWS FROM GNOSIS

Gnosis: past and future successes

Gnosis has always aimed to improve its products and services that are designed to benefit people and increase their quality of life. At the same time, Gnosis wants to create value through innovation, growth and launch of revolutionary products.

To make sure it stays that way, the company is proud to present the first Non-Animal Chondroitin Sulfate of fermentation origin: MYTHOCONDRO[®], for joint support.

Follow us to know more about our future research and development...

Marketing Manager

**MYTHO
CONDRO[®]**
The Non-Animal Chondroitin Sulfate

Forthcoming
launch in the US
joint market

Great expectations and excitement for the global launch of Mythocondro[®], the Non-Animal chondroitin sulfate, at the next Supply Side West.

Animal-derived chondroitin sulfate has shown some causes for concern regarding quality, reproducibility and safety and has prompted the search of alternative sources.

MYTHOCONDRO[®] is a novel chondroitin sulfate of non-animal origin warrants high purity, clear identity profile, batch-to-batch reproducibility, established safety with an astounding very low content of proteins and other (macro) molecules.

Those attending the Trade Show in Las Vegas will have a unique opportunity to discover the scientific steps forward of the product by participating to the speech organized by Gnosis in the Education Session of the VENDORBRIEF Presentation of the Supply Side West.

The speech will be led by Prof. Nicola Volpi, Associate Professor of Biochemistry, University of Modena and Reggio Emilia, Department of Life Sciences, Modena, Italy, one of the global leading expert in chondroitin.
