## LATEST NEWS FROM GNOSIS

### We are ready for new challenges

2017 is drawing to an end. Always focused on customer satisfaction, the business results of Gnosis are great, and we appreciate that each of you considerably contributed to the development of the different projects that brought a remarkable success to our company.

Gnosis achieved excellent goals throughout the year, which often have led to new authorizations to sell our products to a larger number of countries.

Quatrefolic®, the active form of folate, has been authorized in China. Mythocondro® the non-animal CS, has won confidence in the US market with the launch of the first products and later in the EU market as well, obtaining the approval as a Novel Food ingredient. VitaMK7® - the best vitamin K2 as MK7 with excellent purity and stability - strongly increased its performances. Last but not least Emotion®, the best form of S-Acetyl-Glutathione (GSH), has entered the North America market with its enhanced bioavailability.

Even if these are just few of the achieved goals so far, they represent a starting point for our brilliant and constant success in our business. Tomorrow we will definitely face more challenges that should be turned into possibilities.

To all of you and your families, we wish a Merry Christmas followed by a year of happiness.

*Paolo Malesani*  
Commercial Director

### Watch Gnosis new video with the biggest events of the year

During 2017, Gnosis has achieved its main purpose: spreading knowledge through strong technical support, directly facing with customers, key opinion leaders and the whole scientific world.
